<p>Outstanding effort and understanding. Your final product is original and personal; making use of your own memories. The tone is supportive and sensitive.</p>	<p>Your project shows excellent effort and you clearly used your time well. The focus of your project is on factual information so more personal memories would have improved it.</p>	<p>Your project shows clear effort and you included some relevant information but you needed far more detail to make this book a valuable introduction to QE. Don't rush, take your time on ILTs.</p>	<p>Although this book contains some useful information, there are tasks missing. This suggests that you did not use your time as wisely as you could have done.</p>	<p>Your project shows that more time and attention to detail was needed in this ILT. You did not seem to consider the reader, their questions and what they might want to know.</p>
