

1.

Most days, I go to school, and learn in my classroom. I see my classmates, my friends, and my teachers.

2.

I'm going to be staying at home now, because my school is closed.

3.

School is closed because a lot of people are getting sick in. It isn't safe or healthy for me to go to school right now.

4.

It can be hard to stay at home and things will be different from when I am at school. I might not go to the store with my family, I might not go out to other places.

5.

Staying at home, washing my hands, and covering my mouth will help keep germs from spreading, and will help people not get sick.

6.

I might feel sad or scared, and that is okay. My family, teachers, and school care about me. If I am feeling upset, I can talk to my family, draw, write, or move to help me feel calm.

7.

At home, I can still learn and have fun. I can read, play, listen to music, and learn new hobbies.

8.

It's okay to feel uncomfortable now. But I know I will go back to school soon, and I can share about my time at home with my friends and teachers.
